TELESCOPING EXTENSION TABLE

Model 75-550 M1 RADIAL ARM DRILL PRESS

Versatile design with variable swing up to 31 7/8", tilting head up to 30° left or right with easy to read angle scale.

Forced opening switch need a re-start in case of power failure.

Table swivels 360° for operations either on or off the table.

Table tilts 45° left and right.

Table extension provides additional support for longer / larger work pieces.

See-through chuck guard included.
