

Model 10-550 M1

“PRO TURBO” AIR CLEANING SYSTEM

Optional accessories

Cleans quickly and quietly to improve workshop air quality.

Filters up to 98% of 5 micron airborne particles and up to 85% of 1 micron particles.

All steel construction with a durable powder coated finish.

Superior 2 stage filtration system includes a disposable, pleated outer filter and a 3 pocket inner filter. No tools required for filter changes.

Includes filter cleaning sensor with indicator light. No more guessing if filter needs cleaning.

Select between continuous run or timer operation, including 1-15 hour timer run settings in 1 hour increments.

Will not affect ambient room temperature.

Includes 4 top mounted eye-bolts for ceiling installation.

Remote control for convenient operation (AAA batteries sold separately).
